The following is an examiner's statement of reasons for allowance:

1. Watanabe et al. Patent No. 4,522,984 (cols. 10-11, Examples 1-9 shows lactone-modified epoxy resins having melting points of 81-85°C (Example 1), 130°C, 100°C and 70°C (col. 11, Table 1, Examples 2-5) and liquids (Examples 6-9). Nakamura et al. Patent No. 5,037,899 shows lactone-modified epoxy resin with softening points of 105°C (cols. 5-6, Example 1), 102°C, 103°C and 108°C (col. 7, Table 1, Examples 1-3). Nowhere else within these patents is there any recitation of a melting point or softening temperature.
2. There is no motivation to prepare the lactone-modified epoxy resins of the closest prior art to Watanabe et al. and Nakamura et al. such that the melting or softening point is reduced significantly to within the claimed range of from about 40°C to about 65°C. Japanese Patent No. 53-58536 does not disclose the claimed lactone-modified epoxy resin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Sellers whose telephone number is (571) 272-1093. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
